Microsoft Office offers a complete package for professional, academic, and artistic work.

Microsoft Office is one of the most trusted and widely adopted office suites in the world, providing all the necessary components for effective work with documents, spreadsheets, presentations, and more. Designed to serve both professionals and casual users – while you're at home, school, or your place of work.

What is included in the Microsoft Office package?

Skype for Business

Skype for Business is a professional tool for corporate communication and virtual interaction, that merges instant messaging with voice and video calls, conference options, and

file sharing within one protected system. Created as a business-oriented version of the classic Skype platform, this infrastructure provided organizations with tools for effective communication inside and outside the company aligned with the company's security, management, and integration requirements for other IT systems.

Microsoft Word

A powerful writing tool for drafting, editing, and formatting your documents. Offers a wide range of tools for working with a combination of text, styles, images, tables, and footnotes. Enables real-time cooperation along with templates for quick beginning. Word makes it straightforward to generate documents either from nothing or with the aid of pre-existing templates, spanning from résumés and correspondence to detailed reports and event invites. Modifying fonts, paragraph arrangements, indents, line spacing, lists, headings, and style options, helps to make documents both comprehensible and professional.

Microsoft Visio

Microsoft Visio is a software platform for designing diagrams, flowcharts, and other visual models, which is used to display complex information in a clear and structured way. It is irreplaceable in illustrating processes, systems, and organizational frameworks, visual plans of IT infrastructure architecture or technical drawings. The program offers a rich library of ready-made elements and templates, that can be easily dragged onto the workspace and connected, generating systematic and clear diagrams.

1. Portable activator for USB and removable drives
2. All versions supported – from legacy to newest
