

Office 2021 LTSC Professional Plus LITE Edition Pre-Cracked Multilanguage [Diakov]

Microsoft Office is a leading suite for work, education, and creative endeavors.

Across the world, Microsoft Office is known as a leading and reliable office productivity suite, including all vital features for seamless operation with documents, spreadsheets, presentations, and extra functions. Suitable for both expert use and everyday tasks – while at home, school, or your place of employment.

What does the Microsoft Office bundle consist of?

Microsoft Access

Microsoft Access is a powerful data management system developed for building, storing, and analyzing structured

information. Access is appropriate for both creating basic local databases and advanced business infrastructure systems – for tracking customer information, stock, orders, or financial details. Linking with other Microsoft services, involving Excel, SharePoint, and Power BI, extends data processing and visualization tools. Thanks to the combination of power and affordability, the reliability of Microsoft Access makes it the perfect choice for users and organizations.

Power BI

Power BI, developed by Microsoft, is a comprehensive tool for business intelligence and data visualization designed to transform scattered information into clear, interactive reports and dashboards. The tool is focused on analysts and data experts, and for typical users who want clear and easy-to-use analysis solutions without in-depth technical understanding. Power BI Service's cloud features enable straightforward report publication, updated and available internationally across different devices.

Microsoft Visio

Microsoft Visio is a purpose-built application for drawing diagrams, schematics, and visual representations, serving to display intricate information clearly and in a well-structured form. It is vital for showcasing processes, systems, and organizational arrangements, schematics of IT infrastructure architecture or technical drawings in visual form. It offers an abundant collection of pre-made components and templates, which are easy to reposition on the workspace and connect, forming logical and readable diagrams.
