

Office LTSC x86 No Serial Needed v16.90

Microsoft Office is a dynamic set of tools for professional, academic, and artistic work.

Microsoft Office is considered one of the most prominent and dependable office solutions globally, including all essential tools for effective handling of documents, spreadsheets, presentations, and beyond. Suitable for both specialized tasks and regular activities – at your house, school, or place of work.

What applications are part of the Microsoft Office suite?

- **Interactive hyperlinks in PowerPoint**

Adds clickable navigation links for seamless transitions and external references.

- **SharePoint document integration**

Provides seamless access to shared files and version control for team collaboration.

- **Power Query integration**

Allows users to import, combine, and refine data from multiple sources directly within Excel.

- **Planner and Outlook task integration**

Link tasks and calendar events across Microsoft Planner and Outlook for better project tracking.

- **Security awards and certifications**

Recognized for advanced encryption and compliance with global standards.

Microsoft OneNote

Microsoft OneNote is an electronic notebook created to quickly and conveniently gather, keep, and organize all kinds of thoughts, notes, and ideas. It pairs the straightforwardness of a notebook with the technological sophistication of modern software: here, you can add text, embed images, audio, links, and tables. OneNote can be used effectively for personal notes, school, work, and group projects. Thanks to the Microsoft 365 cloud integration, all records are automatically updated on each device, delivering data access wherever and whenever needed, whether on a computer, tablet, or smartphone.

Microsoft Excel

Excel is one of the leading tools offered by Microsoft for working with data in numerical and tabular formats. Globally, it facilitates reporting, data analysis, forecasting, and data

visualization tasks. Owing to the broad spectrum of options—from basic calculations to complex formulas and automation—Excel covers both daily operational tasks and advanced analytical work in business, scientific, and educational sectors. The tool allows users to effortlessly build and adjust spreadsheets, style the data according to the criteria, then perform sorting and filtering.

Microsoft Visio

Microsoft Visio is a software designed specifically for creating diagrams, charts, and visualizations, intended to showcase complex data in a transparent and organized manner. It is integral when illustrating processes, systems, and organizational arrangements, visual representations of technical drawings or IT infrastructure architecture. The application offers a broad library of pre-designed elements and templates, that can be easily dragged onto the workspace and connected, creating logical and straightforward diagrams.

Power BI

Power BI, created by Microsoft, is a robust data visualization and business analytics platform meant to convert unstructured information into user-friendly, interactive reports and dashboards. The instrument is tailored for analysts and data specialists catering to standard users who need basic and comprehensible tools for analysis without technical training. Reports are easily disseminated thanks to Power BI Service in the cloud, updated and available from anywhere around the world on various gadgets.

1. Patch to remove trial limitations and software watermarks
2. Keygen generator supporting complex and custom serial formats
3. Updated crack supports cloud-based apps and services
