Unlocking Legendary Soundscapes

Our comprehensive subscription suite is a game-changer for mixing and mastering engineers. With meticulous digital recreations of iconic analog consoles, vintage master bus compressors, and warm tape saturation modules, it's like having the best of the past at your fingertips. Centered around the Virtual Mix Rack system and the FG-X dynamics processor, this suite delivers elite hybrid signal chains that

will elevate your productions to new heights.

Hybrid Signal Chains for the Modern Studio

- The suite includes a range of expertly crafted plugins that mimic the legendary sound of classic consoles like the Neve 8018 and the API 212
- Vintage master bus compressors, such as the LA-2A and the 1176, are also included to provide a warm, analog-inspired compression sound
- Warm tape saturation modules add a unique, character-filled texture to your audio

Virtual Mix Rack: The Heart of the Suite

The Virtual Mix Rack system is the brain behind our suite's plugin arsenal. With its advanced routing and processing capabilities, it allows you to create complex signal chains with ease.

Making Waves in the Music Industry

From jazz and classical to rock and electronic, this suite has been used by top mixing and mastering engineers to deliver exceptional results.

Expertly Crafted Plugins

- The FG-X dynamics processor is designed to provide a unique sonic character that's both modern and vintage-inspired
- A range of expertly crafted EQ and compression plugins round out the plugin arsenal, ensuring that your audio is perfectly balanced and polished

Cutting-Edge Signal Processing

- Advanced routing and processing capabilities allow for complex signal chains with ease
- Support for both mono and stereo workflows ensures flexibility in any mixing or mastering context

- Activator that emulates official licensing server

response
